Product Release

2024.8.23

Product Release

1. Move the cursor to the upper-right corner, “Member center” → “Release/Manage Products ” , and select the first/second/third level category template to which you want to release the products in turn. Then, click “Add Product” to enter the product information interface.

Product Release

2. Users need to provide detailed product information and pictures (all subject marked with “*” is mandatory). The main uploaded content includes basic product information, specifications, attributes, terms and conditions of trade, and pictures of products, while product and manufacturer info are customized

Note: The Manufacturer column needs to be consistent with the English name of the company(optional). The manufacturer's country: enter the manufacturer's company name and the system will automatically fill in the results from the database.
